PROFESSIONAL SUMMARY WEB DEVELOPMENT

I am a Frontend Developer. I create web pages with modern frontend applications and frameworks, such as React, TypeScript, and Tailwind, to deliver engaging and responsive user interfaces for various clients and projects. I am passionate about information and technology, and I enjoy learning new skills and tools to enhance my web development capabilities. I also value collaboration and communication, and I work well with diverse teams and stakeholders to achieve optimal outcomes and customer satisfaction.

I am a highly motivated Frontend Developer with a proven track record of creating visually appealing and user-friendly web interfaces. I possess a deep understanding of frontend technologies and best practices, allowing me to develop robust and scalable web applications.

I'm very passionate about leveraging my skills to solve complex problems and deliver innovative solutions that exceed client expectations. I'm also committed to continuous improvement and stays updated with the latest advancements in frontend development. I excel in collaborative environments, where strong communication and teamwork skills enable me to effectively collaborate with cross-functional teams to achieve project goals.

• **Landmark University**   **2018-2022**

B.sc in Microbiology

• **HiiT**   **2022-2023**

Web Development Diploma

WORK EXPERIENCE

I have collaborated with several companies, contributing my expertise in frontend development to enhance user interfaces and deliver impactful digital experiences.

HiiT Plc   **ABUJA**

- Focused on the client-side of web development, which involves creating the user interface and designing the look and feel of a website.
- Used tools such as HTML for structuring web content, CSS for styling and layout, and JavaScript for adding interactivity and dynamic elements.
- Designed and implemented a web application compatible with multiple browsers with minimal errors
- Developed responsive websites and Debugging
- Absorbed techniques from experienced developers to apply towards daily projects and team collaborations.

GeekOps Tech   **ABUJA**

- Made use of tools like HTML to organize content, CSS to style and arrange content, and JavaScript, TypeScript, and React to add dynamic elements and interactivity.
- Worked closely with UI/UX designers and product managers to deliver high quality software solutions.
- Provided valuable ideas to enhancing the development of the website.
- Concentrated on the client-side of web development, which includes designing the website's appearance and feel and developing the user interface.
- Debugging
- Acquired strategies from senior developers to use in day-to-day work and group projects.

Solid Fiction   **LAGOS**

- Worked closely with the UI/UX design and product managers to deliver high quality software solutions.
- Debugging
- Provided valuable ideas to enhancing the development of the website.
- Made use of tools like HTML to organize content, CSS to style and arrange content, and JavaScript, NextJS to add dynamic elements and interactivity.
- Provided responsive website which is compatible on all devices.
